

## Symptom-Free Covid-19 Testing

Twelve15 encourage you to participate in symptom-free testing. The Government's symptom-free testing strategy will help to reduce transmission of Covid-19 in education settings by identifying symptom-free positive cases. Those who test positive will then self-isolate, helping to reduce transmission of the virus. The symptom-free testing programme does not replace the Government's current testing for those with symptoms. If you have symptoms, **do not** come to work and arrange a full symptomatic test.

You can have symptom-free tests (also known as a Lateral Flow Test) through your school site, or Surrey County Council if your school site does not have testing available.
